

Acconod
SMART CONNECT

FLEET INTELLIGENCE PLATFORM

Acconod helps fleet operators monitor vehicles, track trips, manage drives, reduce downtime and improve decisions with live dashboards and connected vehicle data.

Live Fleet Tracking

Route Monitoring

Driver Behaviour

Fuel Efficiency

Maintenance Planning

Geofencing

Asset Visibility

Real Time Alerts

Real Time Visibility

See every vehicle, every trip, every moment.

Predictive Maintenance

Anticipate issues and prevent costly breakdowns.

Operational Insights

Turn vehicle data into action with powerful dashboards.

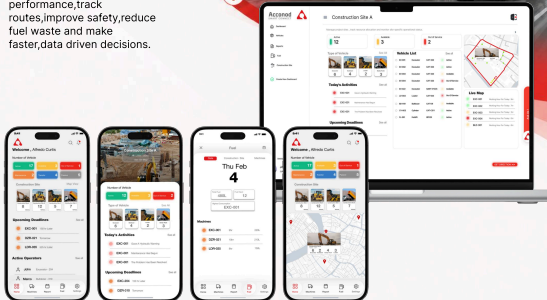

WHAT IS

Acconod

SMART CONNECT

Acconod is a cloud native fleet management platform that connects vehicles, drivers and trips into one intelligent environment.

It helps teams monitor fleet performance, track routes, improve safety, reduce fuel waste and make faster, data driven decisions.

Real Time Monitoring

Track vehicles, trips and driver activities in real time with live dashboards and KPIs.

Operational Decision Support

Turn fleet data into insights to optimize operations and drive better outcomes.

Connected Fleet

Connect vehicles, devices and driver apps to unify all fleet data in one platform.

Live Telemetry

Capture high frequency telemetry from vehicles and devices and stream it secure to the cloud.

Driver Insights

Monitor driver performance and behavior to promote safe driving and improve efficiency.

Fleet Visibility

Gain complete visibility of your fleet's health, utilization and location anytime, anywhere.

HOW ACCONOD WORKS

CONNECT

Connect vehicles, devices and driver apps securely to the platform.

COLLECT

Collect real time data from vehicles and devices at scale.

ANALYZE

Analyze data, detect patterns and generate actionable insights.

ALERT

Deliver intelligent alerts to the right people at the right time.

IMPROVE

Act on insights, optimize operations and continuously improve results.

KEY MODULES

Live telemetry, dashboard, maps and remote commands for industrial and vehicle devices alike from any browser.

Live Fleet Tracking

Track vehicles in real time with live location, speed, status and route updates.

Route Optimization

Optimize routes to reduce distance, fuel costs and delivery times.

Driver Behavior

Monitor driving habits like speeding, harsh braking and idling.

Fuel Management

Track fuel usage, detect anomalies and reduce wastage and costs.

Predictive Maintenance

Predict vehicle issues before they happen and schedule maintenance.

Geofencing Alerts

Set geo-boundaries and receive instant alerts for events and violations.

Report & Analytics

Access powerful reports and insights to measure performance and KPIs.

Asset & Trailer Visibility

Monitor trailers and assets in real time for better utilization.

Key Benefits

Real-Time Visibility

Gain instant visibility into fleet movements, status and performance.

Faster Decisions

Access accurate insights faster to make confident, data driven decisions.

Reduced Downtime

Detect issues early and take proactive action to minimize disruptions.

Smarter Fleet Operations

Optimize resources, routes and maintenance to drive efficiency and savings.

MORE SCREENS

Explore key Acconod screens designed to simplify fleet monitoring, vehicle control, fuel tracking and operational reporting from one connected platform.

MAIN DASHBOARD

Get a quick overview of fleet status, active sites, alerts and key operational data from one central screen.

VEHICLE LIST

View all vehicles in one place and track their current status, availability and assignment details.

CONSTRUCTION SITE DETAIL VIEW

Monitor site-specific activity, assigned machines and operational data for each construction area.

REPORTS

Access summarized operational data and performance insights to support better planning and evaluation.

FUEL REPORT

Track fuel usage, total consumption and related metrics to improve cost control and efficiency.

VEHICLE MANAGEMENT

Manage vehicle information, status, assignments and maintenance records from a single interface.

Centralized Control

Manage key fleet operations from one connected platform.

Operational Clarity

Understand vehicle, site and fuel activity at a glance.

Connected Workflow

Link tracking, reporting, fuel monitoring and vehicle management.

Clear Screen Flow

Move easily between dashboards, reports and management screens.

FROM FLEET DATA TO SMARTER OPERATIONS

How Acconod connects vehicle data and transforms it into actionable intelligence.

Fuel Management

Track fuel usage, detect anomalies and reduce wastage and costs.

Decision Support

Turn data into confident, smarter decisions.

Driver Behavior

Understand driving patterns and risks.

Maintenance Planning

Plan proactive maintenance and reduce disruptions.

DATA SOURCES

Acconod PLATFORM

MANAGEMENT TOOLS

Mo 720 Telemetry Device

Collects vehicle telemetry in the field and securely transmits data to the Acconod platform.

GNSS / Location Module

Provides live location, speed, route history and movement based positioning data.

CAN Bus / Vehicle Signals

Reads engine status, fuel level, fault codes and key diagnostics information.

Fuel & Service Inputs

Adds fuel usage, maintenance records and service planning data for fleet operations.

ACCONOD PLATFORM

Acconod consolidates telemetry and fleet data into dashboards, analytics, alerts and maintenance workflows.

Live Dashboard

Alerts & Notifications

Register & Analytics

Maintenance Planning

One platform. Complete fleet clarity. Smarter operations.

OUTCOMES

Predictive Maintenance

Anticipate failures and extend asset life.

Fleet Visibility

See every vehicle, every trip, every moment.

Improved Efficiency

Optimize routes, reduce fuel use and operating costs.

Reduce Downtime

Minimize unplanned outages and keeps your fleet moving.

Vehicle Tracking

Collect live telemetry, GNSS, engine and I/O data.

Fuel Analytics

Visualize data with dashboard, maps and telemetry charts.

Service Planning

Plan and track maintenance to reduce downtime and cost.

Alert Driven Action

Register devices, assign groups and manage configurations.

ONE PLATFORM CONNECTED FLEETS SMARTER DECISIONS

Acconod helps fleet teams connect vehicles, monitor performance, detect problems earlier and improve operations with real time intelligence.

Fleet Visibility

Get real time insight across vehicles, drivers, routes and locations.

Predictive Maintenance

Detect anomalies early and prevent issues before they impact operations.

Data Driven Improvement

Make informed decisions with accurate data and actionable insights.

Connected Teams

Align operations, maintenance and management on one unified platform.

Asset Tracking

Track vehicles and equipment in real time for better control and utilization.

Maintenance Follow Up

Streamline maintenance tasks and ensure timely follow up for optimal performance.

FLEET MANAGEMENT PLATFORM

Connected Vehicle

Seamlessly connect vehicles, sensors and systems across your fleet.

Cloud Analytics

Process and analyze data in the cloud for scalable and real time insights.

Secure Platform

Enterprise grade security to protect your data, systems and operations.

Operational Action

Turn insights into action with alerts, workflows and performance tracking.
